

Business Continuity & IT Comms Room Services

Business Continuity & IT Comms Room Services

When failure is not an option™

Power Continuity Systems are your Business Continuity specialists providing all IT and Comms Rooms power protection- no break seamless power. PCS can design, supply, install and maintain a bespoke Power Protection Solution ensuring your business operations are never affected by loss of power or disruptive power surges.

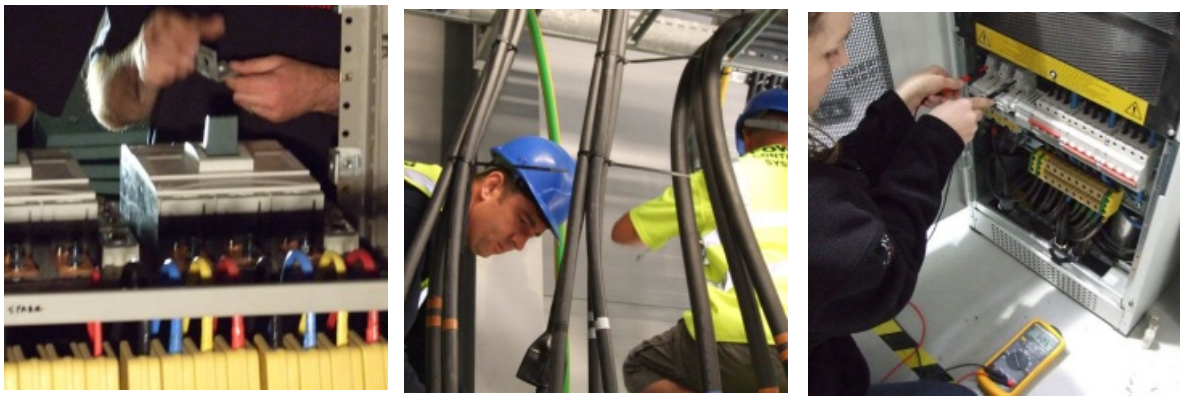

Our experienced teams, with over 20 years experience will guide you through from the initial FREE site survey consultation to the design stage then onto installation, commissioning followed by our market leading after sales servicing and maintenance plans.

PowerContinuity are totally independent without any brand allegiances, therefore PCS recommend the best solution for YOUR organisation. Because we offer the full range of power protection services, we provide true added value allowing you to choose from a comprehensive choice of service options. Not just one brand and no choice - we at PCS offer you choice!

Business Continuity & IT/Comms Room Services

Uninterruptible Power Supplies

PowerContinuity Systems work with all the leading brands of UPS and are 100% independent so you can always be assured that the system recommended is the most suitable for your requirements.

All installations are carried out by fully qualified and experienced UPS Service Engineers fully trained for the particular UPS brands. Electrical works are NICEIC certified.

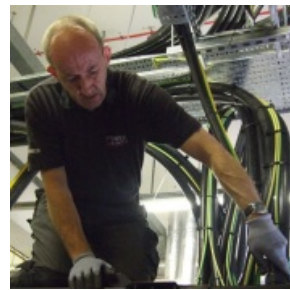

All Leading Generator Makes Available

Power Continuity does not supply just one make of generator engine. We have close supply relationships with all the leading brands offering you a complete range to choose from.

Not every generator is easily accessible:

City Centre Roofs
Secure Facilities
Remote locations

Power Continuity has successfully carried out generator installations in all of the above situations and is happy to carry out these more demanding installations efficiently and safely.

Generators

We design, manufacture and install bespoke diesel generators. From open set to acoustic canopies, standby or prime, 30kVA to 3MVA, PowerContinuity Systems can provide you with a bespoke standby power solution sited in virtually any location.

IVECO

Perkins

SDMO

Comms Room Services & IT Environments

As well as UPS and Standby generators, PowerContinuity Systems provide a one stop solution for all your IT & Comms Room requirements.

Whether it's the installation of cabinets, air conditioning, remote monitoring systems and ancillaries, Power Continuity is with you every step of the way. Our service is your choice.

Not only can we advise you on specifications by designing and fitting out your IT & Comms rooms, we can also install a complete mirrored Disaster Recovery Centre for the ultimate in business continuity: in the event of a catastrophic loss of your main hub, the recovery centre will ensure your operations are not interrupted.

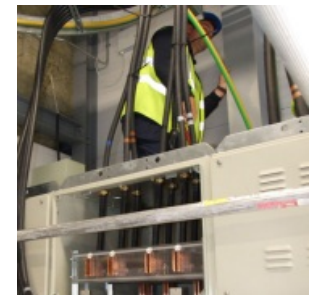

Remote Monitoring

Power Continuity provides remote monitoring solutions, which monitor not only the Uninterruptible Power Supply but much more.

Our systems can monitor:

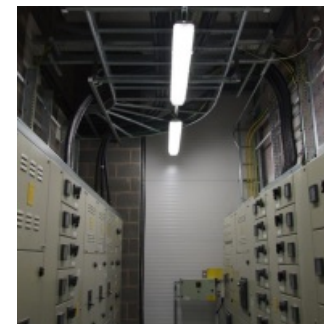

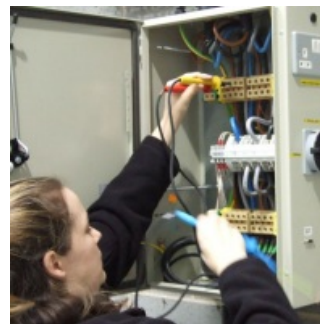

- UPS's
- Standby generators
- Smoke alarms
- Building Management Systems
- Air conditioning
- Temperature
- Humidity
- Security Systems

Complete Business Continuity Solution

We don't just install generators or uninterruptible power supplies. Power Continuity Systems are 'The Power Protection Partner' offering a comprehensive service including full project management of your power system solution, from design to installation to provide your organisation with business continuity:

- Full planning including survey, plans and schematics
- Design and consultancy service for IT & Comms rooms, air conditioning and remote monitoring
- Liaison with any third parties (local electricity provider, planning departments, road closures)
- All ground works, trenching, welding and palisade security fencing erection, concrete plinths and earthworks
- Cabling, installation, delivery, positioning and testing of all equipment both at the factory and on site
- Test certification, commissioning and end user training.

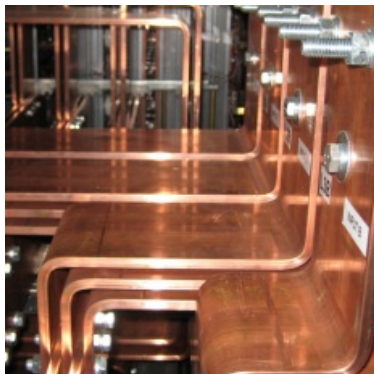

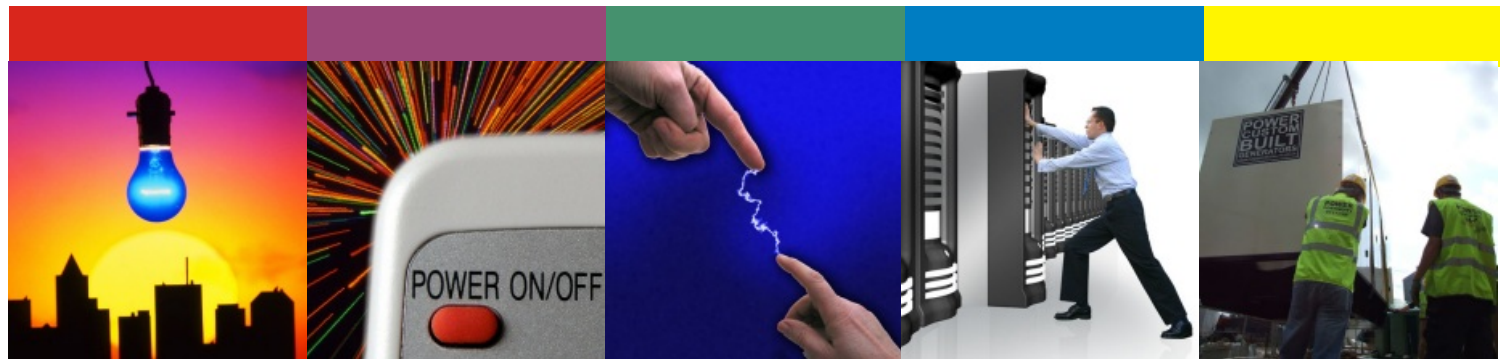

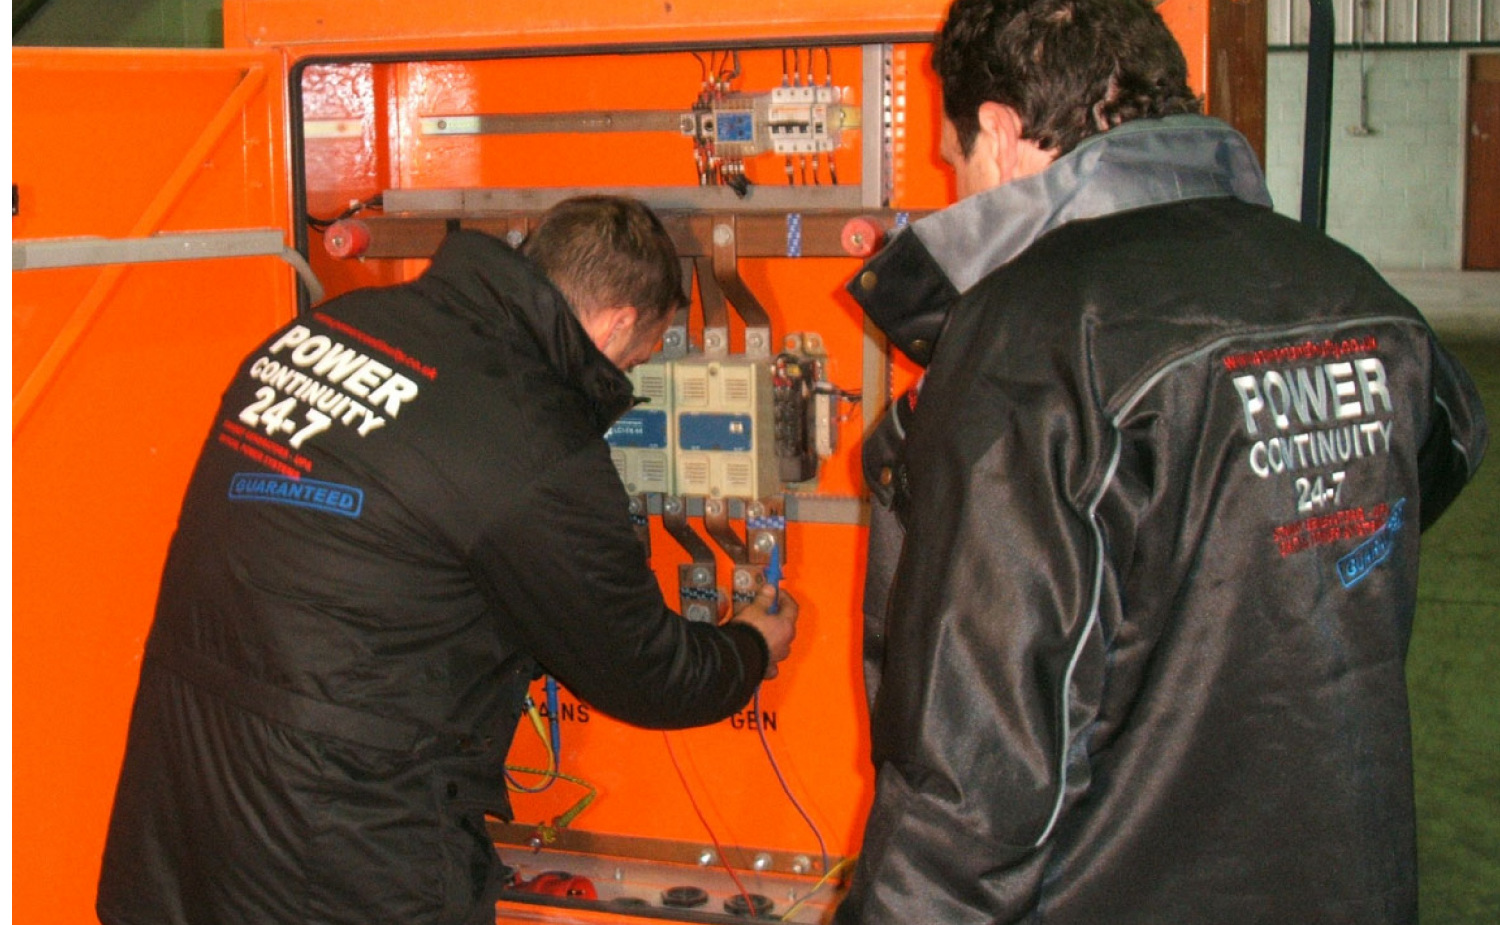

The servicing and maintenance of your power protection equipment is absolutely necessary in order to keep your systems in optimal performance. What you don't maintain... will fail.

Power Continuity System's network of specialist engineers will carry out all servicing and maintenance in accordance with the manufacturer's specifications and requirements.

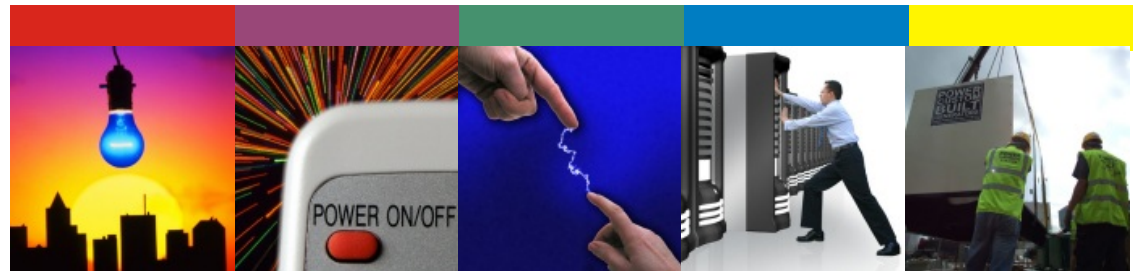

Offering our clients the comfort of a 4 -6 hour or same day response 24/7/365 to site together with our 24 hour helpline, there's always a specialist engineer here to help. Power Protection it's what we do
